5) Develop PDF Development guide for Jasper

Luminator Technology Group	Scott Watters	Project Status	<div></div>
Jesse Orrico LLC	Jesse Orrico		

Summary Update:	Work Completed				
#	Key Issues / Decisions Needed	Owner	Date	Resolution Plan	
1	None at this time	Scott Jesse			
#	Milestones	Owner	Date	Status	Comments
1	Create annotated screens with verbiage for each expected action and interaction for developer team	Jesse Alden Ryan Dana		✓	

Thoughts / Observations

# ✓	Key Observations / Concerns	Suggested Owner	Action Plan
✓	Checklist need to be simplified	Jesse/Scott	Will be simplified as part of the onboarding process changes
✓	Data Extraction / Reporting - Where will this live?	Alden/Scott	Decided that there will be no reporting for launch
✓	Assets - Do they go beyond Jasper? Should we have a content management UI for assets as a separate app?	Jesse/Scott	Decided that Assets will live inside Jasper for now. This is very easy in our designed system to move because it's a stand alone item

✓ Completed

● Activities on track,
no critical issues

● Work in progress; some critical issues being
resolved

● Critical issues requiring
intervention

Team Questions

- None at this time

SOW Summary

Complete the User Interface and User Experience for Jasper, a Granite Suite Application. Clean up existing UI components from Jasper, and create a universal component sheet.

1. Create Master UI Component Template
2. Refine Interactions
3. New Screen Mockups
4. Necessary Interstitial Interactions
5. Develop PDF Development guide for Jasper

Jesse's Notes

#	Key Observations / Concerns
1	Assets in Granite will only host Jasper content for now. Assets is accessed from the global menu however.
2	"History" has been punted to a later phase per Scott's request on 6/1/18.
